

Harsh Khurana

Frontend engineer with six years building React and TypeScript applications, focused on performance and accessibility.

EXPERIENCE

MODIFI Services Pvt Ltd, Remote — JavaScript Engineer

FEB 2022 - Present

- Sole frontend owner of five services on the transactional platform — trade, billing, matching, customer, and PDF generation — the last including its own Express API.
- Cut staging translation load times from 10+ seconds to under one by forking the company's Traduora service to serve cached JSON instead of a live two-step authenticated fetch, then rolling the change out across all services.
- Added production alerting for missing translation keys and failed translation loads, surfacing gaps in monitoring rather than in customer support tickets.
- Built a detailed view for the bulk-invoice flow used by high-volume vendors, enabling the admin team to resolve CSV-to-invoice mismatches without escalating to engineering.
- Worked across every product surface — customer onboarding, the transactional platform, admin tooling, and the public marketing site — including ButterCMS, Google Tag Manager and Analytics integration.

Seawise Capital, Delhi — Software Engineer

JUNE 2021 - JAN 2022

- One of two engineers at a seven-person trade-finance startup, working full-stack across the customer web app and internal admin tools (JavaScript, Node.js, SQL).
- Rebuilt the customer dashboard from the ground up, replacing the legacy interface.
- Shipped core platform features: invoice creation, buyer credit scoring, undertaking document templates, and automated payment reminders.
- Built the transactional email system — status-triggered notifications and cron-scheduled daily digests summarising each seller's open trades.

Fame Technologies, Remote — Front End Web Developer

JUNE 2020 - SEPT 2020

- Delivered four client projects at a web agency: new responsive marketing sites, frontend-backend API integration, and feature work on existing codebases (HTML, CSS, JavaScript, React).
- Rebuilt the agency's own landing page from scratch in vanilla JavaScript and CSS.

SKILLS

Programming/Markup Languages

JavaScript, TypeScript, SQL, C/C++, HTML, CSS, Sass

Frontend

React, Next.js, Redux Toolkit, React Router, Tanstack Query, Framer Motion, CSS Modules, Styled Components, Storybook

Backend & Data

Node.js, Express, PostgreSQL, Drizzle, Rest APIs

Tools & Platforms

Git, Github, Netlify, Vercel, ButterCMS, Google Cloud/Analytics/Tag Manager, Storybook, Figma

PROJECTS

Answer My Questions

Full-stack quiz platform for building, taking and sharing quiz sessions — React, React Router, TanStack Query, Redux Toolkit, Express API deployed on a GCP Compute Engine VM; drag-and-drop question ordering and route-level auth.

Zomggy

Food ordering app with menu browsing, cart management and checkout — React 19, TypeScript, Vite, Express API.

Card Memory Game

Browser memory-matching game — React, TypeScript.

EDUCATION

H.M.R. Institute of Technology and Management, Hamidpur, Delhi

2017 - 2021

Completed my Bachelor's degree in Computer Science with CGPA of 8.5

Himalaya Public Sr. Sec. School, Rohini, New Delhi

2013 - 2017

I scored 89% in my 12th Standard and 10.0 CGPA in my 10th.

INTERESTS

Competitive Programming, Boulderling, Badminton, Working out.
